SUPPLEMENTARY INFORMATION:

I. Background

In the *Federal Register* of March 2, 2022 (87 FR 11719), FDA published the notice of availability for a draft GIF #258 entitled “Use of Tracers in Animal Food, Type A Medicated Articles, and Medicated Feeds” giving interested persons until May 2, 2022, to comment on the draft guidance. FDA received one comment submission on the draft guidance and the comments in that submission were considered as the guidance was finalized. The guidance announced in this notice finalizes the draft guidance dated March 2, 2022. This guidance replaces CPG Sec. 680.100 “Tracers in Animal Feed.”

This level 1 guidance is being issued consistent with FDA’s good guidance practices regulation (21 CFR 10.115). The guidance represents the current thinking of FDA on the use of tracers in animal food, Type A medicated articles, and medicated feeds. It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

II. Paperwork Reduction Act of 1995

While this guidance contains no collection of information, it does refer to previously approved FDA collections of information. Therefore, clearance by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501-3521) is not required for this guidance. The previously approved collections of information are subject to review by OMB under the PRA. The collections of information in 21 CFR 501.22 have been approved under OMB control number 0910-0721. The collections of information in 21 CFR part 514 have been approved under OMB control number 0910-0032.
